

The GOLD MEDAL of the MASSACHUSETTS HORTICULTURAL SOCIETY was awarded to R. \& J. Farquhar \& Co. for Superior Quality of Flowering Bulbs

Table showing the Depth and Distance Apart at which the Leading Kinds of

Bulbs should be Planted.

## BULBS for WILD GARDENS and NATURAL PLANTATIONS.

An effect of Narcissus Poeticus Ornatus with Ferns at North Easton, Mass.

$T \mathrm{H}$HE WILD GARDEN is nearer to nature than any other style of garden. It is simple, inexpensive, permanent, and being ar ranged on nature's plan it is not readily destroyed by occasional neglect
Its Subjects are the best of our native plants and plants allied to them from countries having climates similar to our own From northern Japan, Siberia, northern Europe and the mountainous parts of southern Europe, there have been obtained many plants adapted to the American Wild Garden.

Among hardy herbaceous plants the Asclepias, Asters, Boltonias, Campanulas, Columbines, Dictamnus, Epilobium, Echinops, Day-Lilies, Lobelias, Lythrum, Monarda, Evening-Primroses, Rudbeckias, Stokesia, Thermopsis, are a few of the many available. We shall be pleased to furnish a larger list with prices upon application.

The following bulbous plants are especially suitable for natural plantations, and when once planted hold their own and increase with little or no further care.

Allium Aureum, Bright Yellow
Chionodoxa Gigantea. Blue
Chionodoxa Lucilliae, Glory-of-the-Snow. Blue

## CULTURE OF HYACINTHS.

YACINTHS IN POTS. It is important in the pot culture of the hyacinth to have rich, light soil - if possible, a compost of one-third decayed turf, one-third old rotten cow manure, and the remainder equal parts of sharp sand and leaf-mould. This compost should be made a few weeks before being used. If the bulbs are to be potted singly, pots five inches in diameter are the proper size, and the special Hyacinth pots, which are about two inches deeper than ordinary pots, are preferable. Cover the hole in the pot with a piece of broken pot, and over this place a layer of moss, which will keep the soil from clogging the drainage thus provided. Break off any offsets which appear at the base of the bulbs, and in potting place each bulb so that its top shall be half an inch below the surface of the soil and an inch below the rim of the pot. The soil should be of usual natural moisture, and should be pressed moderately firm. The filled pots may be placed in a cold frame where there is protection from frost, and well watered. An excellent plan is to place them on a bed of moist, sifted coal ashes, covering the pots to a depth of six inches with the same material. When well rooted, which will be in about six weeks, the bulbs may be brought indoors and forced. For the first two or three weeks they should be kept in a temperature not exceeding 50 degrees. Success in forcing depends much on their having strong roots before being brought to the light. The top grows rapidly, and unless the roots are started much in advance they are unable to nourish the plant, and failure results.

Hyacinths for early use may be potted in September or October; late planting is not advisable, as the bulbs deteriorate; when desired for late use, it is better to pot them in October and keep them in a cold frame above freezing until it is desired to force them into bloom.

To obtain dwarf foliage and fine flower spikes, Hyacinths when being forced should have plenty of manure-water, fresh air, and should be kept very near the glass. The blooms last much longer if shaded from the sun.

Hyacinths in Glasses. The single varieties are, with a few exceptions, best adapted to this mode of culture; they produce finer flower spikes than the double

Fill the glass with clear, soft water, so as nearly to touch the base of the bulb, putting a small piece of charcoal in each glass to keep the water pure, and afford some nourishment. The filled glasses should be placed in a dry, cool, dark place, and kept there until the roots almost touch the bottom of the glass, when they may be exposed gradually to the light. If the water in the glasses becomes foul, or diminished, replace it with fresh water at about the same temperature as the atmosphere in which the bulbs are growing; otherwise it need not be changed.

When well started, the bulbs should have plenty of light and air, without draughts, in order that the best development and brilliancy of color may be attained.

Hyacinths in the Open Garden. The ground should be dug to a depth of at least fifteen inches, and enriched with plenty of well-rotted cow manure.

Hyacinths may be planted from September until winter sets in; although if the highest success is sought they should be in the ground by the end of October. Bulbs planted early develop roots in the autumn, and these, if protected from injury by freezing and thawing alternately during the winter, enable the bulbs to produce much larger flower spikes than if the roots are not developed until spring. Frost reaching the bulbs raises them up, thus detaching them from their roots. Protection may be afforded by covering the beds with straw or leaves to a depth of six or eight inches, which should be removed early in the spring. Hyacinths should be set six inches below the surface of the ground and six inches apart.

Hyacinths in Boston Public Garden.
FARQUHAR'S EXTRA LARGE NAMED BEDDING AND FORCING HYACINTHS.
The Reduced Price at which these Hyacinths are offered this year makes them attractive for out-door bedding and winter forcing.

This highly decorative class of Hyacinths is of unsurpassed excellence for producing fine color effects in public parks and private grounds. Being of distinct and decided shades, of almost uniform height, and blooming at the same time, they admit of the most artistic grouping. They are also very desirable for forcing singly in pots or grouped in bulb pans.

Per Dozen, $\$ 1.00$; per $100, \$ 6.00$; per $1,000, \$ 50.00$. If by mail, add 15 cents per dozen for postage.

## LARGE UNNAMED HYACINTHS FOR BEDDING AND FORCING.

These are well developed, sound flowering bulbs, superior in size and strength to the Mixed Hyacinths usually offered. Choice sorts only are included in these selections which are grown separately and put together in variety of shades of each color. Care is exercised to include only sorts which bloom at the same time and are of nearly uniform height.

## MINIATURE HYACINTHS.

These are most fascinating both for forcing in pans, and for out-door bedding, and are gaining in popular favor each year.
La Grandesse, white. Gertrude, pink. Garibaldi, red. Grand Maitre, light blue. King of the Blues, dark blue. King of the Yellows, golden yellow. Each, .50 per doz.; $\$ 3.50$ per $100 ; \$ 30.00$ per 1,000. If by mail, add 10 cents per dozen for postage.

COMMONWEALTH OF MASSACHUSETTS
Office of Sergeant at Arms, State House, Boston. May 10, 1910
R. © J. Farquhar © Co. Were a perfect glow. We have used our best iudgment in the Gentlemen. Our tutips are a perfect ghour arrangement of colors, but we gladly glve your house the credul for this beautitul show. In the last fourteen years we have planted from hoon to 10,000 of your bubs each year. and
we have never had a single error or a bulb that did not prove true to name and color. We heartily appreciate this. Yours truly.

GEORGE M. FILLEBROWN, Massenger.

THESE beautiful Hyacinths are indispensable to the florist in his autumn and winter cutflower work; while to the amateur they are among the most easily cultivated and most satisfactory of flowering bulbs. The white variety, if planted early in September and gently forced, will bloom in November; the others require from two to three weeks longer

When grown in pots or pans they are most effective planted in groups of six or more bulbs in each.

White. Extra Large. 600 per doz ; $\$ 450$ per $100 ; \$ 40.00$ per 1,000
White. Mammoth. Soc per doz.; $\$ 6.00$ per $100 ; \$ 55.00$ per 1,000.
Pink. 50 c . per doz. ; $\$ 4.00$ per $100 ; \$ 35.00$ per 1,000 .
Light Blue. 500 . per doz.; $\$ 4.00$ per 100; $\$ 35.00$ per 1,000 .
White Italian or Parisian. These are about a fortnight later than the Early White Roman Hyacinths and the blossoms somewhat larger. They are very useful for forcing, being fragrant and decorative. 50c. per doz.; $\$ 4.00$ per 100; $\$ 3500$ per 1,000.

Hyacinthus Candicans.

## SINGLE EARLY TULIPS

RARQUHAR'S RAINBOW MIXTURE. (Trade-mark Registered.) The varieties included in this mixture are grown separately, and are all popular large-flowered bedding sorts of decided merit. The colors are carefully proportioned, and include white, yellow, pink, scarlet, crimson and many beautiful shades and combinations of these colors. The sorts are selected to flower at nearly the same time and with slight variation in height. For massed beds and grouping our Rainbow Mixture is unsurpassed. The bulbs offered are of the largest size and finest quality. Per doz., 35 cents per $100, \$ 2.50$; per $1,000, \$ 20.00$.

Farquhar's Rainbow Mixture Single Early Tulips, at the Harvard University Botanic Garden, Cambridge, Mass.

## SINGLE MAY-FLOWERING OR COTTAGE GARDEN TULIPS.

THE May-Flomering Tulips are usually in full blonm about Memorial Day and generally last mell into June. Nont onlv do they prolong the Tulip season but in grandeur of form and richness of their colors surpasi most of the earl:er chases. They are splendid subjects for natural plantations, for clumps in herbaceous perennial borders as well as for formalleds. For cu:tang they are even better than the early tulips-the flowers being stronger and lasting longer.

Bouton d'Or. (Ida.) Pure deep yellow ; beautiful, large, globe-shaped flowers; excellent for cutting
Caledonia. Orange, scarlet centre, greenish black; splendid for bedding
Cornuta. (Chinese Horned Tulip.) Yellow, striped scarlet : petals curiously twisted like spiral horns
Elegans. Dark crimson with elegantly reflexed petals
Elegans Alba. A beautiful large white sort with reflexed petals, margined rosy-red
Flava. Delicate lemon yellow
Florentina Odorata. Yellow, violet scented, very hardy
Fulgens. Vermilion red, long reflexed petals, tall and very showy
Gesneriana Major. Very large flowers, brilliant scarlet with blue-black centre ; lasts several weeks. An excellent bedding Tulip

R. \& J. FARQUHAR \& CO., BOSTON.

## DARWIN LATE SINGLE TULIPS

THE colors range from the palest lilac to purplish black, including shades of rose, scarlet, crimson, violet, brown, white, etc. The Darwin Tulips are the strongest race of all, their massive leaves being often eight inches broad and their splendid flowers two to three feet in height. They bloom with the Columbines, three or four weeks after the Single Early Tulips. Clumps of them along the edge of shrubbery and in hardy plant borders are very effective. They are especially beautiful when cut for vases.

Darwin Tulip Gretchen.

Angelina. Soft rose
Ariadne. Fiery scarlet
Baron de la Tonnaye. Clear rosy-carmine, base white, tinged blue
Bronze Queen. Light yellow ; extra large
Clara Butt. Exquisite shade of soft salmon-pink a large flower of remarkable beauty

## NARCISSUS JONQUILLA OR JONQUILS.

The delicately graceful forms, delicious fragrance, and deep yellow color of their blossoms have made the Jonquils favorites of the amateur and necessities with the florist. They are easily forced, and if started early may be flowered by Christmas, or even earlier. Plant six or eight bulbs in a six-inch bulb pan, covering the crowns half an inch, and 'reat them in the same manner suggested for hyacinths.
Double, Sweet Scented. Fine deep yellow
Single, Sweet Scented. Deep yeilow; free blooming
Campernelle. Large deep yellow flowers, excellent for
cutting.
Rugulosus. Rich yellow ; very fragrant; the largest
Silver Jonquil. (Avarcissus Tenuior.) Pale primrose.

## NARCISSI OR DAFFODILS.

A. Natural Plantation of Narcissus Poeticus.

For Natural Plantations. This is the day of the natural garden and the Daffodils are among its most charming subjects. Once planted there is no limit to their existence and they improve and multiply each year, provided they are replanted when after several years they become too crowded. There is not a single sort in the entire list that may not be advantageously used. The accompanying illustration shows a natural border of Poeticus, one of the cheapest, yet most fascinating Daffodils. Other inexpensive forms suitable for such massing are Barri Conspicuus and many of the Leedsi and Incomparabilis sections, while the large trumpet varieties, many of which are likewise inexpensive, may be planted in comparatively small clumps with good effect. Each clump or mass should be of one variety - they should not be mixed-but the effect of planting a number of kinds each in a separate clump is most pleasing and extremely interesting.

For Formal Beds. The Daffodils are charming, too, planted in beds, especially when combined with an undergrowth of the blue Scilla Siberica, Forget-me-not, or other dwarf spring flowers. They should be planted in October or early in November. The bulbs should be set from four to five inches deep; the larger sorts five or six inches apart and the small varieties three to four inches. They should never be planted in very windy situations.

For Clumps in Hardy Plant Borders. Groups of Daffodils in borders of hardy herbaceous plants and along the edges of shrubbery beds are exceedingly effective and delicately beautiful.

For Greenhouse Culture. The commercial florists have been foremost to give the Daffodils the attention due them. They have learned how easily and successfully these lovely fiowers may be forced into bloom during winter (even as early as Christmas), and how fascinating and lasting are the blossoms. They may be planted in pots or bulb pans six inches or more in diameter, several bulbs in each, according to size, and treated in the same manner as Hyacinths.

## LARGE TRUMPET NARCISSUS.

Ard Righ or Irish King. Magnificent golden yellow trumpet, splendid for forcing, very early, Emperor. Immense flower; irumpet, clear, golden yellow; perianth, deep primrose, often three and a half inches across; fine forcing sort, Empress. Rich yellow trumpet with broad white perianth; a flower of great size and substance; one of the finest Daffodils; forces well
Glory of Leiden. Clear yellow; one of the largest of the Giant Trumpet varieties. A fine exhibition sort. Awarded first-class certificate, R. H. S., London

| Doz. | :on | 1,40 |  | Doz. | 100 | 1,000 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| . 50 | 3.00 | $\$ 25.00$ | Grandee Maximus. Large golden-yellow trumpet; perianth, white, broad, and finely imbricated; one of the best of the Bicolor type; a little later than Horsfieldii | . 30 | 2.00 | 18.00 |
| 2.75 | 18.00 |  | Henry Irving. A noble flower of rich golden yellow; trumpet, large and wide, recurved at the lip; petals of the perianth, broad and overlapping; very handsome | . 35 | 3.00 | 25.00 |

Horsfieldii. (King of the Dafjodils.) One of the best Daffodils for forcing and bedding trumpet of enormous size, deep golden yellow; perianth white; a striking flower. 4oc. per doz.; $\$ 2.75$ per $100 ; \$ 22.00$ per 1000 .
J. B. M. Camm. A lovely Daffodil of great sub stance. Trumpet rich yellow changing to c.amy yellow, perianth white. First-class Certificate R. H. S., England. 85c. per doz.

Madame De Graaf. The largest and finest IThite Trumpet Daffodil ; the trumpet on opening is pale primrose, but the whole flower soon becomes pure white. It is A...r:aing for forcing in pans.

Madame Plemp. Large pure white perianth golden yellow trumpet; very large wellformed flowers. 85 c . per doz.; $\$ 6.00$ per

Mrs. J. B. M. Camm. A handsome white variety of graceful appearance. Trumpet large and creamy white, perianth pure white. First Class Certificate R. H. S \$2.00 per doz.; \$12.00 per ion.
Irs. Thompson. Large early white; trumpet beautifully frilled. 6oc, per doz. ; $\$ 4.00$
Mrs. Walter T. Ware. Pure white perianth and elegantly shaped rich yellow trumpet 5c. per doz.; $\$ 5.00 \mathrm{per}$ 100.
Obvallaris. (Tenby Daffodil. ) Pure bright yel low; erect growing sort, of fine form, with Wide trumpet and broad perianth; very early, excellent for forcing and bedding. ${ }^{5} 5 \mathrm{c}$. per doz.; $\$ 2.50$ per $100 ; \$ 20.00$ per

Princeps Maximus. A large and great1y im proved form of the popular 1. . Princeps Which has always been a favorite forcing sort. It is very early, of good substance, and keeps well when cut. The trumpet is of large size and deep yellow; perianth, pale primrose. 20C. per doz.; $\$_{1.50}$ per Rugilobus. Large golden yellow trumpet ; perianth, primrose, often three inches broad; tree-blooming; excellent for forcing and bedding. 35 C . per doz. $\$ 2.50$ per 100 Spurius. One of the finest Trumpet Daffodils, self-colored, clear yellow; large wide-mouth trumpet ; excellent forcing and bedding sort. ${ }_{25} \mathrm{c}$. per doz.; \$1. 75 per 100; $\$ 15.00$ per

Trumpet Major, Dutch Grown. Trumpet and perianth, deep golden yellow, flower, large very effective; the most popular Daffodil for both forcing and bedding.

Trumpet Major, French Grown. Desirable to force for Christmas, should be potted in September. 40 c . per doz.; $\$ 2.50$ per 100

Trumpet Maximus, or Hales' Beaten Gold. Immense size; trumpet, deep golden yellow, gracefully recurved and fringed; perianth, deep yellow, elegantly twisted. $50 c$ per doz.; $\$ 3.50$ per $100 ; \$ 30.00$ per 1000 .
Vanilla. Large bold yellow trumpet and sulphur yellow perianth; very tall. Flowers have the odor of vanilla. $\$ 1.00$ per doz.

Victoria. Bold, erect, clear yellow trumpet of large size, and beautifully frilled at the mouth; perianth, creamy white, broad and of good substance. Awarded a first-class certificate of merit by the Massachusetts Horticultural Society. 50 c . per doz.; $\$_{3.50}$ per 100; $\$ 30.00$ per 1000 .

## CORBULARIA OR HOOP PETTICOAT NARCISSUS.

Bulbocodium. (Yellow Hoop Petticoat.) Dwarf variety with deep golden-yellow flowers, a number of which are produced by each bulb. It is very pretty when forced; ten to twelve bulbs in a six-inch pan. It is also charming for edges of beds, and is very hardy. l'er dozen, 75 cents; per $100, \$ 4.50$; per $1,000, \$ 40.00$.

## MEDIUM TRUMPET NARCISSI.

This class includes many of the most beautiful and useful Daffodils, with flowers often from three to five inches across. The characteristic feature of this section is that the trumpet is usually half the length of the divisions of the perianth, giving the flower a very refined form. In flowering they follow the Large Trumpet Narcissus. They are equally desirable for open-ground cultivation and forcing in the greenhouse or window.

Barrii Conspicuus. Large broad spreading perianth, primrose yellow; crown, yellow conspicuously edged with orange-scarlet. unexcelled for cutting and lasts long in water after being cut
Barri Flora Wilson. Pure white perianth, cup yellow, edged with orange scarlet
Barri Maurice Vilmorin. Creamy white perianth, cup rather long and heavily stained scarlet; very beautiful
Barri Sensation. Pure white perianth, cup canary yellow, edged orange scarlet; extra fine
Incomparabilis Autocrat. Large full yellow perianth, cup yellow, broad and well expanded
Incomparabilis Beauty. Sulphur yellow perianth; large yellow cup margined orange scarlet; a bold strong flower, vigorous grower
Incomparabilis Cynosure. Large showy flower of free growth, primrose-white perianth, with bold orange scarlet crown; a beautiful Daffodil; forces well

| $\$ 0.25$ | $\$ 1.50$ | $\$ 12.00$ |

| .75 | 4.50 |  |
| 2.50 | 18.00 |  |
| .40 | 2.50 | 22.50 |

Incomparabilis C. J. Backhouse. Perianth yellow, with long, rich orange scarlet cup; extra fine
Incomparabilis Frank Miles. A large, soft, clear yellow flower, elegantly twisted,
Incomparabilis Queen Bess. One of the earliest chalice-cupped Daffodils; perianth, pure white, cup clear yellow
Incomparabilis Sir Watkin. Giant Welsh Duffodil. Large primrose perianth, frequently over 5 inches across; cup rich golden yellow, elegantly fringed; one of the finest Daffodils
Incomparabilis Stella. Pure white peri anth, with bright yellow crown; very early and easily forced
Incomparabilis Princess Mary. Perianth creamy white and large orange tinted cup beautifully imbricated.
Leedsii Amabilis. White perianth ; cup pale primrose, changing to white; fragrant ; excellent for forcing and open ground.
Leedsii Duchess of Brabant. (Vincenti.) Elegant white perianth: small canary yellow cup; a charming variety
Leedsii Grand Duchess. White perianth, cup stained apricot orange, early and beautiful
Leedsii Katherine Spurrell. Very broad sulphury white perianth, canary cup, large well-shaped flower
Leedsii Minnie Hume. Large white peranth, spreading cup, passing from lemon to white. First-class certificate R. H. S.

## CHINESE SACRED NARCISSUS.

Joss Flower or Oriental New Year's Lily.
These may be grown in pots of earth, but are more interesting and very satisfactory in bowlpartially filled with pebbles and water. As ...roots develop they form a network about the pebbles, thus supporting the plant when in bl m . They should be started and grosin in ': ign lige. but carefully protected from draugi. $1 \%=$ flowers are mostly white with yellow cups and are very fragrant.
Extra Large Bulbs, Selected, io cents each; 3 for 25 cents; $\$ 1.00$ per dozen.
Original Baskets, 30 bulbs, $\$ 1.75$ per ba-ket

MEDIUM TRUMPET NARCISSI.-Con'd.

Leedsii Mrs. Langtry. A lovely free-blooming Daffodil, which should be largely grown out of doors. The flowers bave a broad, white perianth, with the cup white or pale primrose; each bulb generally produces several flower stems. Leedsii Duchess of Westminster. Large pure white perianth, long soft canary y ellow cup tinged with orange
Nelsoni Major. Broad ivory white perianth and clear yellow cup, a striking flower
Triandrus Albus. (Cyclamenfowered Narcissus or Angel's Tears.) Very interesting and beautiful small Daffodil with creamy white pendulous flowers.

Six of a Kind Sold at Dozen Rates: 25 at 100 Rates; 250 at 1,000 Rates.

## NARCISSUS

 POETICUSPHEASANT'S EYE DAFFODIL.

One of the finest for naturalizing.

SHORT.CUPPED NARCISSI.-Continued.
Poeticus. (Pheasant's Eye or Poet's Narcissus.) Pure white with red crown; very fragrant ; excellent for forcing and cutting. For naturalizing in woodlands and wild gardens this is one of the very best sorts; it is perfectly hardy and will thrive in almost any situation where not exposed to high winds

| Doz. | 100 | 1.000 |
| :--- | :--- | :--- | eticus Grandiflorus. The largest of the type, pure white perianth, cup suffused with crimson

Poeticus King Edward VII. (Almira.) Broad pure white perianth, with cup canary yellow with orange scarlet crown; very large
Poeticus Ornatus. Large symmetrical flowers; broad white perianth with red crown ; very early ; beautiful and valuable for forcing and cutting .
Poeticus Poetarum. Large, bold flower; perianth pure white, with the entire crown crimson; very striking and beautiful

Alba Plena Odorata. (Double Poet's or Gardenia-flowered Narcissus.) Large, double, pure white flowers, in sweetness and purity rivalling Gardenia blossoms; valuable for cutting Incomparabilis Plenus. (Bulter and Egys.) Large, double, yellow flowers, with orange centre; excellent for forcing, for winter cutting, and for spring flowering in the open ground
Orange Phaenix. (Eggs and Bacon.) Large, double, white flowers with rich orange segments in the centre; very effective and desirable for both forcing and outdoor planting

## NARCISSI.

POET'S AND OTHER SHORT-CUPPED NARCISSI.

Biflorus. (Primrose Peerless Daffodil.) Pure white with yellow cup, bearing two flowers on each stem
Burbidgei. Perianth white with yellow cup edged with scarlet; resembling Poeticus, but much earlier

| Do\%. | 100 | 1,000 |
| ---: | ---: | ---: |
| $\$ 0.20$ | $\$ 1.25$ | $\$ 3.50$ |
| .20 | 1.25 | 7.00 |

DOUBLE FLOWERING NARCISSI. Continued.

Sulphur or Silver Phoenix. (Codlins and Cream.) One of the finest double sorts, with large, pale, creamy white, fragrant flowers; excellent for pot culture $50 c$. per doz.: $\$ 3.00$ per $100 ; \$ 25.00$ per 1,000 .
Von Sion. (Telamonióus Plenus.) The renowned "Old Double Yellow Daffodil." Flowers deep golden yellow: large and very lecorative ; the most extensively gromn of all Daffodils for florists' use. Dutch grown. Double Nosed Bulbs, extra large, 5oc. per doz. ; \$3.00 per 100: \$26.00 per I,000
Single Nosed Bulbs, extra large ; 30c. per doz.; $\$ 2.00$ per 100; \$18.00 per 1,000.

## NARCISSI POETAZ HYBRIDS.

These new hybrids are the result of a cross between Poeticus and Polyanthus and are strong, healthy growers. They have a delicious fragrance of the former, combined with the free-flowering qualities of the latter, each stem carrying from three to six flwers. The bulbs are quite hardy and if planted in permanent groups in the hardy garden soon form large luxuriant clumps. They can also be grown in pots for winter flowering.

Aspasia. White with pure yellow cup; very large $50 c$. per doz.; $\$ 3.00$ per $100 ; \$ 25.00$ per 1,000.
Elira. A large flower of remarkable substance; fine for cutting; color pure white with yellow cup. 40 c . per doz.; $\$ 2.50$ per 100; $\$ 22.00$ per I,000.

Irene. Perianth sulphur yellow with orange cup; large flower trusses. 75 c . per doz.; $\$ 5.00$ per 100 .
Klondyke. Pure yellow wth deep orange eye; very showy: \$1.25 per doz.; \$7.50 per 100 .

Narcissus Sulphur or Silver Phœenix

## ACHIMENES.

Profuse floming tender perennials for greenhouse of onse... :t ... decoration during summer. The scaly tubers should be potted in the early spring in a compost of turfy loam, leaf mould and sand. They should be grown in a moist, warm temperature, shaded from the sun until they begin to bloom, when they should be kept cooler to prolong the durati $\quad \therefore$, ! ? flowers. The colors comprise white, shades of lilac, mauve, and red :livery in December.

Argus. mauve.
Celestial. pure white, spotted violet towards the centre.
Dazzle. Bright vermilion dwarf.
Diadem. Bright red
Dr. Carey. Pale rose : large.
Edmond Boissier. White shaded and striped lilac.
Longiflora. Clear blue.
Margarita. Pure white.
Mauve Periection. Clear maure.
Patens Major. mauve with violet shading.
Violacea. Violet with carmine shading ; dwarf and very floriferous.
Vivid. Scarlet.
Each of the above separate colors, \$1.00 per doz.; $\$ 6.00$ per 100.
Mixed Varieties. All colors. 75c. per doz. ; $\$ 4.50$ per 100.

## CROCUSES.

THE bulbs should be set three inches deep, and should be planted in October or early in November to insure success. They are very effective when combined with Snowdrops, Scilla Siberica, Chionodoxa Lualliz, Daffodils, and other Spring flowers. Crocuses may also be grown indoors either in pots or bulb pans in loam, or in dishes filled with wet moss in which the bulbs are set closely, half an inch below the surface.

## LILIES FOR THE OPEN GROUND

THE increased production of many varieties of these in Japan has greatly reduced their cost, and in consequence their use has become very general.
It is our opinion that we should plant the bulbs much deeper than we have done heretofore. While traveling in Japan, we found that the bulbs of the wild Lilies were usually twelve to eigtheen inches below the surface, and we gathered the finest flowers from specimens growing on mountains of decaying lava where they had abundant rainfall and ample drainage. We believe that varieties like Auratum and Speciosum would be favored by being set ten or twelve inches deep and would be less affected by frost and drought. The beds should be thoroughly covered with leaves or litter during the winter.

If Lilies are wanted by mail, add 5 cents each.

SPECIAL NOTICE. Wany of the late fowvering Lilies cannot be shipped from Japan until October, and to save our customers the annoyance and expense of shipments as they mature, we have decided to send all the early varieties, approximately September 15-30. The late sorts, being subject to delays of steamers, etc., will be forwarded early in November, or as suon thereafter as they arrive. We adzise the preparation of the Lily.beds or borders early in autumn, covering them with four to six inches of leazes or other litter, to prevent the ground freezing until the bulbs arrive. The late sorts comprise the following: Auratum, Batemanni, Krameri, Henryi, and Speciosum. Lilium Candidum will be shipped on arrival, as it is essential that they should make a fall growth to ensure perfect blooms the next season.

## OUR NATIVE LILIES,

as shown in the accompanying illustration, are best for producing natural effects. They thrive in moist soil or where there is partial shade, and for such situations no flowers are more satisfactory. Once planted, they care for themselves. The shrubbery is an ideal place for Lilies, their flowers coming when most of the shrubs are out of bloom. Lilium Superbum, Canadense and Philadelphicum are suitable for shrubbery planting as well as the Elegans varieties and the Tiger Lilies. These should be planted in clumps 6 to 8 inches deep and the bulbs 6 inches apart.

Auratum. (Golden-rayed Japanese Lily.) Flowers 6|Each IT..e
to 8 inches in width, pure white, with a wide band of gold running through the centre of each petal and numerous crimson spots. Extra large bulbs.
Auratum Pictum. A broad yellow or red band extends from the base to the tip of each petal. Auratum Vittatum Rubrum. Flowers pure white, with broad crimson band in the centre of each petal; numerous crimson spots
Auratum Virginale Album. Pure white with yellow band in the centre of each petal.
Batemanni. A most beautiful Japanese variety, growing 3 feet high, with six to eight apricot colored flowers on a stem; blooms in July and August
Browni. Large trumpet-shaped flowers, interior pure white, exterior purplish brown; very beautiful.
Canadense. (Canadian Bell-flower Lily.) One of our most beautiful native lilies, flowers bright yellow, with black spots
Canadense Rubrum. Crimson, spotted with black 2 to 3 feet; flowers June and July
Candidum. (Mudonna Lily.) The earliest and one of the most beautiful sorts, large trusses of pure white fragrant flowers
Chalcedonicum. (Scarlit Turk's Cat.) Brilliant scarlet recurved flowers; height 3 feet; June

Lilium Auratum.

Colchicum. (Monodelphum or Scovitzianum.) Beau tiful golden yellow, spotted with black; height 2 feet; superb sort
Concolor. Brilliant scarlet with black spots; 2 feet $151.50 \mid 15 \ldots$ Elegans. These vary in color from yellow to orange crimson, usually with black spots. From eight to twelve flowers are produced on each stem; height. about 2 feet. They bloom in June and July, are exceedingly hardy, and are most effective for grouping among shrubs and for naturalizing the woodlands
Elegans Atrosanguineum. Rich deep .an
Elegans Aurantiacum. Deep yellow, spotted with
black
Elegans Prince of Orange. (Citrinum.) Ap Elegans Venustum. Buff with dark spots
Elegans Van Houttei. Crimson
Excelsum. This charming lily grows from 3 to 4 feet high, each stem carrying from three to twel:flowers. rich buff, delicately spotted crimson, ..... beautifully reflexed, blooms in June and July
Giganteum. A tall variety with a tree-like vipp ..... large roundish leaves. Flowers trumper....... white with purple throat; mammoth I -
Hansoni. Deep golden yellow, spotted crimson, : feet; blooms in June

## LILIES FOR THE OPEN GROUND.-Continued.

Henryi. (The Yellow Speciosum.) A new and very beautiful hardy lily from Northern China. The plants are of vigorcus growth, frequently attaining a height of 6 feet, each stem carrying from five to eight flowers of a nuch apricot yellow; spotted with brown. Each, 75 cents; doz., \$7.50.
Humboldtii. Reddish orange, with purple spots, 4 to 5 feet, July; very handsome. The bulbs should be planted 10 inches deep in well drained soil and mulched during winter. Each, 35 cents; doz., $\$ 4.00 ; 100, \$ 30.00$.
Krameri. Pure blush pink, fragrant and beautiful trumpet-shaped flowers, 3 feet; blooms in August. Each, 25 cents; doz., $\$ 2.50 ; 100, \$ 15.00$.
Longiflorum. Large trumpet-shaped pure white flowers, 2 feet, strong bulbs. Each 20 cents ; doz., $\$ 1.50 ; 100, \$ 10.00$.
Martagon. Purplish crimson, with dark spots, 3 feet, July and August. Each, 20 cents . doz., $\$ 2.00,100, \$ 15.00$.
Pardelinum. Scarlet shading to yellow, spotted maroon, 3 feet. Each, 20 cents; doz., $\$ 1.50 ; 100, \$ 10.00$.
Philadelphicum. Bright orange-red, with purple spots, 2 feet, July. Each, 15 cents; doz., $\$ 1.50 ; 100, \$ 10.00$.
Speciosum or Lancifolium. The most popular class of Japanese Lilies, their hardiness, free growth, and branching habit rendering them most valuable for permanent beds and borders. They grow from 3 to 4 feet in height and continue in bloom from August until frost.
Speciosum Album. Pure white, fragrant. Each, 25 cents; doz., $\$ 2.50 ; 100, \$ 20.00$.
Speciosum Magnificum. White, heavily spotted and shaded with rich crimson ! flowers very large. Each, 25 cents; doz., \$2.50; 100, \$i8.00.
Speciosum Melpomene. White, suffused with darkest crimson. Each, 20 cents; doz., \$2.00, 100, \$15.00.
Speciosum Rubrum. White, shaded and spotted with rosy crimson. Each, 20 cents, doz., $\$ 2.00 ; 100, \$ 15.00$.
Superbum. (Turk's Cap Lily.) Rich orange, petails tipped red and dark spotted, 3 to 4 feet; blooms in July and August. Each, 15 cents; doz, \$1.50; 100, \$10.00.
Tenuifolium. (Coral Lily.) A very graceful miniature Lily with fiery scarlet flowers, I $1 / 2$ feet, July. Each, 15 cents; doz., \$1.50; 100, \$10.00.
Tigrinum. (Tiger Lily.) Orange, spotted black, 3 to 4 feet, A ugust, very hardy. Each, 10 cents; doz., 75 cents; $100, \$ 5.00$.
Tigrinum Fortunei. The finest form of Tiger Lily, orange salmon spotted with black. Each, 15 cents; doz , $\$ 1.25 ; 100, \$ 8.00$.
Tigrinum Flore Pleno. (Doubleflowering Tiger Lily.) 3 to 4 feet, August. Each, 10 cents; doz., 75 cents; $100, \$ 5.00$.
Wallacei. Orange-scarlet, spotted with maroon, 3 feet, September. Each, Io cents; doz., \$1.00; 100, $\$ 7.00$.

A Group of Native Lilies.

Lilium Harrisii.
LILIUM CANDIDUM. (Ascension or English Lent Lily.)

THESE are grown for us in the north of France, and are the large, thick petalled variety, with pure white flowers; excellent both for forcing and open garden cultivation.
Mammoth Northern Grown. Each, is cents; per uoz., Sr.50; per ioo, $\$ 8.50$; per $1,000, \$ 80.00$. By mail, add 5 cents each, for postage.

## LILIES FOR FORCING

THE bulbs may be potted from August onward in a compost of equal parts turfy loam, ! 1 : C , rotten cow manure, and sand. It is best to start them in pots not ex $\cdots$...lu. $\cdots=$ their own diameter, in which they 1 a: remain until started eight inches or mus. They should be transferred then to larg:r pots in which to bloom, exercising great care not to disturb the roots or break away the soil from about them, and setting them considerably deeper in the larger pots. This method prevents the soil from becoming sour, and enables the roots forming at the base of the st-m to become feeders, greatly increasing the number and size of the blossoms

## R. \& J. FARQUHAR \& CO., BOSTON.

## FARQUHAR'S JAPANESE IRISES. Iris Kempferi:

N these we find combinations of form and beauty far excelling any other type. The stately flowers are often 10 to 12 inches in diameter, and of wonderfully varied and beautiful colors. They require rich, moist soil. Our collection is a direct importation from Japan and is remarkably fine. Plants set out now. bloom next summer. Each, 25 cents; Doz. $\mathbf{\$ 2 . 5 0} ; \mathbf{1 0 0}, \$ 15.00$.

Gekka=no=nami. Petals pure white with yellow blotches, standards creamy white; double

## AMARYLLIS

Amaryllis Hippeastrum.

AGAPANTHUS. (African Lily.)
Handsome summer and autumn flowering plants, throwing up large umbels of twenty to thirty blossoms. They should be grown in pots or tubs, in soil similar to that suggested for hyacinths. They are particularly suitable for piazza or terrace decoration, and may also be forced in the greenhouse.
Umbellatus. Fine blue. Each, 25 c. ; per doz., \$2,00 ; by mail, 35c. each Umbellatus Albus. White. Each, 25c. ; per doz., \$2.00.

## ALLIUM.

Aureum. (Moly.) Hardy spring flowering border plant with bright yellow flowers, very showy. Per doz., 15 c. ; per 100, 75 c. ; per 1,000, $\$ 6.00$.
Azureum. Deep azure-blue flowers in large umbels. Per doz., \$r.oo: per 100, $\$ 6.00$.
Neapolitanum. Large heads of pure white flowers, very hardy ; extensively forced by florists for cutting purposes. Per doz., 20c. ; per $100, \$ 1.25$; per $1,000, \$ 8.00$.
Ostrowskianum. A beautiful new variety from Asia Minor, with large umbels of purplish-red flowers; hardy and early. Per doz., 25c. ; per 100, \$2.00.

## ANTHERICUM.

Desirable hardy plants with elegant lily-like flower spikes; excellent for cutting. Delivery in Spring
Liliago. (St. Bernard's Lily.) White; height, $1 \frac{1}{2}$ feet. Doz., \$1.00; $100, \$ 7.50$.
Liliastrum Major. (St. Bruno's Lily.) White; height, $11 / 2$ feet. Doz., $\$ 1.25$; 100, \$10.00.

## ARUM

Ornamental plants with calla-shaped leaves and flowers; curious and interesting.
Dracunculus. (Dragon Flower.) Large purple flowers.
Each, I5c. doz., \$1.50; 100, \$10.00.
Italicum. Spotted yellow foliage. Each, 5c. ; doz., 40c.; 100, \$2.00. Maculatum. Leaves spotted with white; flowers white; hardy with covering during winter. Each, 15c.; doz., 85c.; 100, \$5.00.
Sanctum. (Black Calla.) Large purple flowers. Each, 35c.; doz., $\$ 2.50 ; 100, \$ 15.00$.

## ASPHODELUS LUTEUS.

Orramental hardy border plant growing about two feet in height ; flowers yellow. Each, 10 cents ; per doz., $\$ 1.00$; per $100, \$ 7.50$.

ANOMATHECA CRUENTA
A pretty Fres-ia-like plant for pot culure, about nine inches hish wist scarlet flowers spotted crimson. Per dozen, 20 cents; per 100, \$r. 25

Anthericum Liliastrum Major.

## ANEMONES.

NONE of the spring flowers surpass the Anemone in brilliancy of color and profusion of bloom. They are very lasting, and have of recent years become very popular for cut-flower use and for table decorations. The florists now buy thousands of them to force. Plant in October or November, six roots in a six-inch pot or bulb pan, covering them one inch. They may be kept in a cellar or frame protected from frost until spring, when they may be placed in the greenhouse or window to bloom.

Single Finest Mixed. Including many colors
Single Blue. Charming variety
Single Scarlet. Very brilliant
Single White. (The Bride.) Pure white, beautiful
Single Appenina. (Blue Wood Anemone.) Flowers large, beautiful sky-blue ; very early
Single Fulgens. (Scarlet Wind Flower.) Flowers dazzling scarlet; large and numerous; one of the best for forcing
Single De Caen. (Giant French Poppy-flowered.) These produce an abundance of very large flowers of brilliant and varied color

Charming spring-fowering plants for the greenhouse, with dark green, hairy leaves; in habit resembling Sparaxis. The colors range from pale lavender and delicate pink to violet and crimson, and are very effective. Plant six or eight bulbs in a six-inch pan. Mixed Varieties, Doz., 30c.; 100, $\$ 2.00$.

## BULBOCODIUM VERNUM. (Meadow Saffron.)

One of the earliest, hardy-spring flowers, with rosy purple crocus-like blossoms, four inches high. Plant four inches deep. Each, 10c.; doz., $\$ 1.00 ; 100, \$ 6.00$.

## CALLA LILIES. (Richardia.)

White Calla. (R. Ethiopica.) First Size Roots
White Calla. Extra Selected Roots
Little Gem. Miniature White Calla
Pearl of Stuttgart. A charming new variety with compact foliage about 18 inches in height, and bearing large massive pure white flowers a foot higher than the leaves. Plants by express only
Elliottiana. (The Golden Calla.) The flowers are of the same form and size as the White Calla, but are pure golden yellow color. The foliage is delicately spotted white. Plants by express only

## CHIONODOXA. (Glory-of-the-Snow.)

THE most beautiful of dwarf blue spring flowers, resembling those of Scilla Siberica, but larger, slightly taller, and more handsome. The Chionodoxa is very hardy, thriving in any ordinary garden soil, and in almost any situation. The bulbs continue to flower from year to year. It is most satisfactory for wild garden and woodland planting, also excellent for forcing.

| Sardensis. Rich deep-blue, with small white centre. | .25 | 1. 50 | 10.00 |

## COLCHICUM. (The Autumn-Flowering Crocus.)

These interesting bulbous plants produce their large Crocus-like blossoms in September, the leaves not appearing till the following spring. They are quite hardy, and are particularly adapted for planting among shrubs, under trees, or other shady situations

Agrippinum. Large lilac flowers; very fine
Autumnale. (Meadow Suffror.) Large lilac blosoms
Autumnale Album. Large pure white flowers; very
beautiful
Autumnale Mixed. Many colors, including white,
lilac, purple, and striped
Speciosum. Reddish-lilac; very large

## CALOCHORTUS. (Mariposa Lily or Butterfly Tulips.)

These Californian flowers somewhat resemble the Tulip in shape and erect habit of growth. The colors include shades of white, lilac, crimson, yellow, and blue, many of the flowers being veined, spotted, or edged with deep yellow. They may be forced in the greenhouse, planted in protected cold frames, or set out of doors in May or June. Finest Varieties Mixed. Per doz., 40 c ; per 100, \$2,50.

## DIELYTRA SPECTABILIS. (Bleeding Heart.)

A well-known hardy plant, bearing in spring long racemes of deep rose pink, pendant flowers. Each, 20 cents; per doz., $\$ 1.50$; per $100, \$ 9.00$.

Fritillaria Meleagris.

## ERANTHIS HYEMALIS

(Winter Aconite.)
The earliest spring flower, the large golden yellow But-tercup-like blossoms often expanding in the snow; height, six inches; a charming plant. Per doz., 20c.; per 100, \$1.25; per 1,000, \$8.00.

Chionodoxa Gigantea.

## ERYTHRONIUM. (Dog's Tooth Violet.)

Interesting and beautiful hardy plants; flowering early and having curiously spotted leaves.

Dens Canis Albo. White
Dens Canis Purpureo. Purple
Dens Canis Rosea
Dens Canis Violacea

R. \& J. FARQUHAR \& CO., BOSTON.

FREESIA REFRACTA ALBA ODORATA.

Freesia Refracta Aiba Odorata.
Blandus. Blush rose, very early
Colvillei Alba. (The Bride). Excellent forcing variety, producing compact spikes of pure white flowers of long duration
Colvillei Rosea. A beautiful variety with delicate pink flowers Colvillei Rubra. Purple, striped lilac; very early
The Cardinalis varieties may be planted in autumn in the open ground if mulched sufficiently to exclude frost, or they may be kept in moist earth in a cellar or pit during winter and planted in the open ground about the middle of April
Cardinalis Ackermani. Salmon flaked carmine, violet eye
Apollo. Orange-salmon, blotched deep orange
Blushing Bride. Beautiful ivory white, with crimson flakes
Crimson Queen. Orange-scarlet flaked violet
General Scott. Delicate rose, red blotches
Mina. Light salmon-red spotted carmine
Mathilde. White, beautifully tinged with lilac-rose
Peach=blossom. Delicate pink; extra fine
Pink Perfection. Bright rose
Sarnian Gem. Salmon
Gladioli Gandivensis. White and light shades; late

$\bigcirc^{F}$F all South African flowering bulbs the Freesia is doubtless the best known and most esteemed. The gracefully branched, fragrant flowers are of long duration, and being freely produced are profitable for commerical purposes, and satisfactory to amateurs. If planted early they may be had in bloom by Christmas. Plant eight or ten bulbs in a six-inch bulb-pan, covering them one inch.

## FUNKIA. (Day Lily.)

Subcordata Grandiflora. (White Day Lily.) This is a vigorous, hardy border plant, with large, roundish, heart-shaped leaves, and strong spikes of fragrant pure white trumpet-shaped flowers

Refracta Alba Odorata. Flowers pure white, with yellow throat. Mammoth Extra Bulbs Selected Extra Large Bulbs
Fischer's Purity. Snowy white.
Mammoth Bulbs. (Crop failed). Extra Large
Freesia Leichtlini. Primrose yellow, with orange blotch on each petal

Undulata Medio Variegata. (Silver Variegated Day Lily.) This valuable variety is now in demand for forcing ; it forms a large rosette of almost white leaves, which is valuable in decorations. It is also extensively used for borders, being extremely hardy

## GLADIOLI.

## EARLY FLOWERING.

These Gladioli are now extensively used by gardeners and florists for winter forcing; the dwarf, branching gracefully-formed flowers being excellent for cut-flower use. If the spikes are cut and placed in water when the first blossoms appear, they will keep expanding and remain beautiful for a week or two. Five or six bulbs planted in six-inch bulbpans or pots make charming groups for conservatory or window decoration; the bulbs should be set an inch and a half deep.

Ixia, Mixed Varieties.
best in rather moist and shady situations.

Blue. Single. Each, 15 cents; dozen, $\$ \mathrm{r} .25 ; 100, \$ 900$.
Red. Double. Each, 20 cents; dozen, $\$ 2.00 ; 100, \$ 15.00$.
White. Single. Each, 20 cents; dozen, $\$ 2.00$; $100, \$ 15.00$.

## IXIAS.

Charming bulbs for winter-blooming, of easy culture and producing very brilliant flowers. The colors include many shades of yellow, pink, scarlet, and crimson. The centre of the flower is always distinct in color from the outer parts, the effect of which is very striking. Plant six or eight bulbs in a six-inch bulb-pan, covering them one inch.
Alba. Pure white. Dozen, 30 cents; 100, \$1.75; 1,000, \$15.00. Aurantiaca Major. Golden yellow with large dark eye. Dozen, 30 cents; $100, \$ 1.75 ;$ I,000, $\$ 15.00$. Crateroides Major. Bright scarlet. Dozen, 40 cents; 100, \$2.50. Maculosa. Beautiful pink. Dozen, 60 cents; $100 \$ 4.00 ; 1,000, \$ 38.00$. Rosea Plena Multiflora. New, soft rose; fragrant. Dozen, 30 cents; $100, \$ 2.00 ; 1,000, \$ 14.00$. Smiling Mary. Bright rosy pikk. Dozen, 75 cents; 100, \$5.00.
Finest Mixed. Dozen, 15 cents; 100, 60 cents ; 1,000, \$4.00.

Grape Hyacinths.

## LILY OF THE VALLEY.

(Convallaria.)
FOR open ground planting we offer large clumps, each containing many fowering crowns. These may be set from six inches to a foot apart and covered three inches. They succeed best in ground which is rather moist and partially shaded.

For forcing the Pips are to be preferred, being grown under conditions tending to promote vigorous and early blooming. Twelve to eighteen pips may be planted in a 6 -inch pot, with all the fibrous roots carefully preserved, and keeping the crowns above the soil. Place them in a temperature of about 80 degrees, cover the crowns with loose moss, and keep them constantly moist with tepid water. They should flower in about five weeks Ready for delivery in November.

Our Exhibit of Lily of the Valley at the Massachusetts Horticultural Society's Spring Exhibition.

Selected Dresden. The earliest, largest, and best for forcing. Strong pips with extra long roots. Per doz., 35 cents; per $100, \$ 2.50$; per $1,000, \$ 20.00$; per case of 2,500 pips, $\$ 42.50$.
Best Berlin. First-class selected pips for forcing. Per doz., 30 cents; per 100, $\$ 2.00$; per 1,000, $\$ 17.50$; per case of 2,500 pips, \$40.00.
Best Hamburg. Strongest pips for late winter and spring forcing. Per doz., 25 cents; per 100, $\$$ r. 75 ; per $1,000, \$ 16.00$; per case of 2,500 pips, $\$ 37.50$.

Pink Flowered. Rosy pink. fragrant. Pips. Per doz., 75 cents; per $100, \$ 5.00$.
Fortin's Giant. A very large growing variety adapted to late forcing and out-of-door cultivation. The pure white bells are much larger than the ordinary variety, and borne upon taller stems. Pips, per doz., 50 cents; per 100, $\$ 3.50$; per r $, 000, \$ 30.00$.
Large Dutch Clumps. Each contains many flowering pips; best for planting in the open ground. Each 30 cents; per doz., $\$ 3.00$; per $100, \$ 20.00$. By express only.

## COLD-STORAGE LILY OF THE VALLEY. (Now Ready.)

We have a fine stock of Cold-storage Lily of the Valley of our Dresden grade, for summer and fall forcing. Put up in cases of 250 and 500 . $\$ 6.50$ per case of $250 ; \$ 1200$ per case of 500 .

## autumn catalogue, 1910.

Montbretia, New Seedlings.

## MONTBRETIA

HARDY border plants, with elegant and gracefully branched Gladiolus-like flowers, which are now much prized for cutting during summer. The colors vary from clear yellow to rich scarlet, and the plants grow about two feet in height. Plant the bulbs five inches deep and protect them during winter with liberal mulching. Delivery in Spring.

Crocosmiæflora. Orange-scarlet
Etoile de Feu. Rich scarlet, yellow centre
Germania. Very large orange scarlet flowers; the finest of all Montbretias
Golden Sheaf. Clear yellow, beautiful
Rayon D'Or. Deep yellow, very large
Rosea. Bright salmon rose
Transcendant. Large golden yellow flowers, outside bright red Pottsii. Bright yellow, flushed with red Mixed Hybrid Seedlings

## NIRENE. (Guernsey Lily.)

These are amongst the earliest flowering bulbs of the Amaryllis family, producing erect stems crowned with beautiful flowers in a few weeks after being potted.
 Fothergilli Major. Flowers vivid scarlet, of shining and delicate texture; very free blooming; superb

[^0]
## OXALIS.

Lovely little bulbous plants for hanging pots and baskets. The bulbs should be planted an inch deep, six or eight in a 5 -inch pot. They need a sunny situation.

Bermuda Buttercup. Flowers clear yellow; very beautiful. Per dozen, 25 cents; per $100, \$ 2.00$.

Boweii. Large rosy crimson flowers and handsome foliage. Per doz., $25 \mathrm{C} ; 100, \$ 1.75$. Grand Duchess Oxalis. These Californian varieties are most desirable for window cul ture, blooming all winter. The plants are of dwarf habit, producing exquisite flowers on long stems.

Grand Duchess White. Per doz., 30 ; per 100, \$2.00. Grand Duchess Pink. Per doz., 30 ; per 100, $\$ 2.00$. Grand Duchess Lavender. Per doz., .25; per 100, $\$ 1.75$. Multiflora Alba. Pure white. Per doz., 25c.; 100, \$1.75. Versicolor. Red, violet and white. Per dozen, 20 cts.; per $100, \$ 1.00$; per $1,000, \$ 6.00$.

Ornithogalum Arabicum.

## SAUROMATUM GUTTATUM. (Monarch of the East.)

This remarkable plant produces without soil or water, when placed in a dry, warm position during winter, a very large curious flower spathe, of reddish color, 15 to 18 inches in length. Monster bulbs, each, 20 cents ; a very large curious flower spathe, of reddish co
per dozen, $\$ 2.00$. By mail, 5 cents each extra.

## ORNITHOGALUM

Arabicum. (Arabian Star of Bethlehem.) An effective variety, with large heads of fragrant star-shaped flowers, white with black eye, borne on erect stems 18 inches high; excellent for forcing and winter cultivation. Per dozen, 40 cents; per 100 , $\$ 2.50$; per 1,000, \$18.00.

Umbellatum. (Star of Bethlehent.) A hardy dwarf variety, with clusters of white, star-shaped flowers. Per dozen, 15 cents : per 100, $\$ 1.00$; per $1,000, \$ 8.00$.

Oxalis, Bermuda Buttercup.

R. \& J. FARQUHAR \& CO., BOSTON.

## DOUBLE CHINESE PAEONIES.

Rlchardson Pæony Dorchester.
September is the best month in which to plant Pæonies. Planted then the roots we offer, all grown in our own nurseries, are almost sure to flower next summer. Of many sorts we offer four-year clumps which are likely to yield from six to ten blooms the first season.

## RARE RICHARDSON PAEONIES.

The Richardson Pæonies are considered among the finest in existence.
Dorchester. Magnificent, large, broad, double flowers of delicate flesh-pink color; fragrant: late. Each, \$1.50. Four-year clumps, each, \$5.00.
Richardson's Perfection. Large globular flowers; clear rose-pink; fragrant; late. Each, $\$_{\text {I.50. }}$. Four-year-clumps, $\$ 5.00$.

## GENERAL COLLECTION.

Amabilis Speciosa. Pink, fragrant. Each, 25 c .; doz., \$2.50. Four-year clumps, each, $\$_{1.00}$; doz., $\$ 10.00$.
Anaconda. Blush pink, guard petals, centre white; a charming flower. Each, 35c.; doz., $\$ 3.50$. Four-year clumps, each, \$1.50; doz., \$15.00.
Anthemis. Delicate rose pink; guard petals a deeper shade; very double; fragrant. Each, \$1.50.

## GENERAL COLLECTION.-Continued.

Arriguir. Bright rosy-carmine; very large, fragrant. Each, .50; doz., \$5.00.
Baron Rothschild. Outside petals rose, centre salmon; large, fragrant flower. Each, 25 c.; doz., $\$ 2.50$. Four-year clumps, each, \$1.00; doz., \$10.00.
Canari. Blush shaded with rosy-pink; early. Each, 35c.; doz., $\$ 3.50$. Four-year clumps, each, \$x.00; doz., \$10.00.
Charles W. Parker. Brilliant crimson, large and full; splendid for masses. Each, $\$ 2.00$; doz., $\$ 20.00$.
Couronne d' or. Pure white globular flowers with amber yellow stamens; inner petals sometimes tipped with crimson; fragrant. Each, $\$ 1.50$; doz., $\$ 15.00$. Four-year clumps, each, $\$ 5.00$.
Crimson Belle. Intense shining crimson semi-double flowers; very showy. Each, \$1.50; doz., \$15.00.
Delicatissima. A tall, bold flower, clear rosy-pink with deeper guard petals; fragrant. Each, 35 c .; doz., $\$ 3.50$. Four-year clumps, each, $\$ \mathrm{r} .50$; doz., $\$ \times 5.00$.
Duc de Cazes. Deep pink, centre salmon; fragrant, blooms in clusters. Each, 35 c . ; doz., $\$ 3.50$.
Duchess de Nemours. Calot. One of the very best pure white sorts, flowers large; fragrant; one of the best for cut flower use. Each, 75 c . ; doz., $\$ 7.50$. Four-year clumps, each, $\$ 2.50$; doz., $\$ 25.00$.

Richardson Pæony Perfection.

Pæony Festiva Maxima at our Dedham Nursery.

## SCILLA.

Extremely hardy, early-flowering bulbs, thriving in any situation and worthy of more general cultivation. The bulbs of S. Siberica should be planted three inches deep; those of Campanulata and Nutans four or five inches deep.
$\left.\begin{array}{ll|l|l|l|l}\hline & \text { Doz. } & 100 & 1,000 \\ \hline \begin{array}{c}\text { Siberica. (Amana or Precox.) } \\ \text { bright blue, of compact growth, flowers charming }\end{array} & & & \\ \text { high; beautiful in combination with Snowdrops or }\end{array}\right)$

## SNOWDROPS. (Galanthus.)

These well-known favorites are among the hardiest and earliest of spring flowers. The bulbs should be planted three inches deep; they thrive in almost any soil and situation.

| Single Flowering. |  | Doz. | 100 | 1,000 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Double Flowering. <br> Elwes' Giant Flowering, <br> with green, of large size, the finest of all Snowdrops | .20 | 1.25 | 9.00 |  |

Those interested in forming permanent natural plantations should not overlook the Snowdrops and Scillas. There are no better subjects for such work.
The former peer through the ground even while the snow covers it, and they are closely followed by the bright blue Scilla Siberica, the earliest of its genus; this in turn, being succeeded by the larger hyacinth-like spikes of Scilla Campanulata in blue, white and delicate rose, commonly known as the Wood Hyacinth.

Single Snowdrops.

## SCHIZOSTYLIS.

Coccinea. (Ḱaffr Lily or Crimson Fiag.) An excellent half-hardy plant for winter forcing, with long slender Gladiolus-like spikes of deep scarlet flowers. Keady for delivery in November.

Each, Io cents; Dozen, 50 cents; roo, \$3.00.

## SNOWFLAKE. (Leucojum.)

The Snowflakes produce flowers like monstrous Snowdrops on stems about a foot high. They are perfectly hardy and have the odor of violets.

Spring Snowflake. (L. Vernume.) White, drooping flowers
Summer Snowflake. ( $\dot{L}$. Astivum.) White

## SPIRÆA. (Astilbe.)

Ready for delivery in November, by express or freight only.

Japonica. One of the best plants for winter and spring forcing. Its rich, dark-green, fern-like foliage is surmounted with a profusion of pure white flowers, rising in erect feathery panicles. It is equally valuable as a decorative pot plant, and for cutting. Being
perfectly hardy, it succeeds well in the open garden, blooming early in summer. Large clumps
Compacta Multiflora. (Grandifora.) A variety of $\mathfrak{F}$ aponica of compact growth, and the flowers somewhat larger; excellent for forcing
Astilboides Floribunda. The habit of growth is dwarf, with erect, long flower sprays of purest white in delicately formed panicles
Hybrida Gladstone. A new large flowering variety with immense trusses of snow-white flowers borne on-long stalks. Excellent for forcing and as a cut-flower is unequalled

## TRITONIA.

Very attractive bulbous plants for pot culture; free blooming and easy of cultivation. They grow from 15 inches to 2 feet in height, of graceful habit, and vary in color from rosy-white to orange-scarlet. Six bulbs may be planted in a six-inch bulb-pan or pot, one inch deep. Doz. 100 Aurea. Golden yellow
Crocata Type. Shades of orange and scarlet
Fine Mixed. Many colors

## HARDY PERENNIAL PLANTS.

## OLD-FASHIONED HARDY GARDEN FLOWERS.

Farquhar's Hybrid Pyrethrums in the Famous Italian Garden of Larz Anderson, Esq., Brookline, Mass.

THE favorites of the old-time gardens are coming to the front, and deservedly so. No feature of the garden can be more satisfactory than a well-arranged Hardy Plant border, producing from April to November a continuous succession of charming flowers, much more interesting than the usual greenhouse assortment, and equally valuable for garden embellishment and cutting purposes. The Hardy Plants have the advantage of greater permanen$c y$, requiring only cultivation, enriching, a slight mulch during winter, and occasional checking of the more robust growers, to keep the plantation in good condition for years.

Where early flowers are desired we advocate the introduction of groups of $\mathrm{Nai}^{-}$ cissi, Scillas, Crocuses, Snowdrops, Chionodoxa and other Spring-flowering bulbous plants, which should be planted in October, as well as Montbrietias, the hardier species of Gladioli and Lilies for summer blooming, and which may be planted in spring.

We limit the present list to varieties which admit of being planted at this season and which have been found generally hardy and desirable for the severe climate of New England.

## FARQUHAR'S COLLECTION OF HARDY FLOWERS.

For purchasers who may not be familiar with the different sorts we offer the following collections for succession of bloom from early spring until November :

12 distinct species or varieties, our selection, \$1.50 25 " " " " " " 2.75 50 " " " " " 0 " 00

Specimen plants, $\$ 2.00$ each and upwards.
Nephrolepis Whitmani. Very finely pinnate fronds resembling N. Piersoni, but finer. Plants in 5 -inch pots, 50 cents each; $\$ 5.00$ per dozen. Plants in 6 inch pots, $\$ 1.00$ each; $\$ 10,00$. per dozen. Ferns for jardinieres. Io splendid varieties. Plants from 2 to 3 -inch pots. 75 c . per doz.; $\$ 6.00$ per 100.

Nephrolepis Exaltata.

## BEGONIA GLOIRE DE LORRAINE.

0F all Winter-Blooming Plants, Begonia Gloire de Lorraine and its varieties are the most lavish in their production of flowers. From October until May, the plants are so profusely covered with blossoms as to almost conceal the foliage. The flowers are of a bright salmon-rose color, growing in large gracefully drooping panicles.
Plants from $2 \frac{1}{4}$-inch póts, each, 25 c. ; by mail, 30 . each : per dozen, $\$ 2.50$; per $100, \$ 15.00$.
Plants from $3 \frac{1}{2}-$ inch pots, each 40 . ; by mail, 50 C . each ; per dozen, $\$ 4.00$; per $100 ; \$ 30.00$. Plants in 6-inch pans, each, \$r.00; per dozen, \$10.00; Plants in 8-inch pans, each, $\$ 2.00$.

## PALMS

## KENTIA BELMOREANA.

Of the erect-growing, feather-leaved Palms, this is the best adapted to house decoration, and it is one of the most beautiful. The foliage is glossy dark green, the segments wide and gracefully recurved.
Plants in $3 \frac{1}{2}$-inch pots, 500 . each ; $\$ 5.00$ per dozen. Plants in 5 -inch pots, 4 to 5 leaves, 18 inches high, $\$ 1.25$ each; \$i2.00 per dozen.
Plants in 6 -inch pots, 5 to 7 leaves, 21 inches high, \$2.50 each; \$25.00 per dozen.
Plants in 7 -inch pots, 6 to 7 leaves, $\$ 3.50$ each. Plants in 8 -inch pots, $\$ 5.00$ to $\$ 7.50$ each. Larger specimens, $\$ 10.00$ to $\$ 20.00$ each.

## KENTIA FOSTERIANA.

This variety is similar to the Belmoreana but of stronger growth and broader foliage.
Plants in 5 -inch pots, 4 to 5 leaves, 18 inches high, $\$ 1.25$ each; $\$ 12.00$ per dozen.
Plants in 6 -inch pots, 5 to 7 leaves, 2 I inches high, $\$ 2.50$ each; $\$ 25.00$ per dozen.
Plants in 7 -inch pots, 6 to 7 leaves, $\$ 3.50$ each.
Plants in 8 -inch pots, $\$ 5.00$ to $\$ 7.50$ each.

Kentia Belmoreana.

JAPANESE
FERN BALLS.
IN southern Japan the long rhizomes of the beautiful fern Davallia Bullata, are collected by the country people and wound about balls of sphagnum moss. These may be started into growth by immersing them in water until saturated, then hanging them in a moderately warm temperature. They should be immersed every two or thre days. They may be dried off and allowed to rest during summer and started again in autumn. Davallia Bullata is hardy in New England.
Dormant Balls, each, 50c. ; by mail, 600 . ; per doz., $\$ 5.00$; per 100,\$35.00. December delivery. Started Fern Balls, each, 75 c .; by mail, goc.

Japanese Fern Ball, Started.

This delicions winter vegetable can be easily raised in a forcing bed or cellar. We are importing only large roots suitable for forcing this winter. Delivery in December. Forcing Crowns: per doz., $\$_{1.50}$; per 100, $\$_{12} .00$

A Bed of Farquhar's English Milltrack Mushroom Spawn.

## R. \& J. FARQUHAR \& CO., BOSTON.

## FarquHar's Evergreen Lawn Grass.

FARQUHAR'S EVERGREEN LAWN GRASS is a mixture of the finest American and European grasses adapted to lawn-making. The formula for this mixture is the result of life-time practical experience in making and maintaining lawns. Neither pains nor expense are spared in obtaining grasses of high vitality and purity. It is our constant aim to make Farquhar's Evergreen Lawn Grass the best, purest and most permanent Lawn Grass sold.

> One quart will sow 300 square feet. Price per quart, 25 cents; by mail, 30 cents.
> Four quarts will sow 1,200 square feet. Price, 85 cents; by express only.
> One peck will sow 2,400 square feet. Price, $\$ 1.50$; by express only.
> One bushel ( 20 lbs.) will sow 10,000 square feet. Price, $\$ 5.00$; by express or freight.
> Six bushels ( 120 lbs .) will sow one acre.
> Weld Garden, Brookline, December 7.
> Gentlemen:-It gives me great pleasure to inform you of the good results I have had with your Lawn Grass Seeds.
> I have used them extensively, not only in Massachusetts but in Washington, D. C., and in St. Louis, Mo., at both of which places there is difficulty in getting good Lawns, and where the successful results from your seeds have been remarkable.
> The It eld Garden in Brookline which has been so frequently described and illustratid in the leading periodicals of the comntry affords the very best evidence of the high quality, purity and permanence of your Lawn Grasses.
> Your Mixtures for various situations and for different parts of the country, I consider especially valuable. Yours truly,
> Duncan Finlayson.
R. \& J. Farquhar \& Co., Boston, Mass.

## NEW BOSTON PARKS LAWN SEED.

We received from Messrs. Olmsted, Olmsted \& Eliot their formula used in seeding the beautiful lawns of Boston's new parks: Franklin Park and the Metropolitan parks were planned by this firm of eminent landscape architects, and their formula may be accepted as the best which experience can suggest for park lawns.

Sow at the rate of 64 lbs . per acre. Price, 30 cents per lb .; by mail, 40 cents; $10 \mathrm{lbs} ., 2.75 ; 100 \mathrm{lbs} ., 25.00 ; 25 \mathrm{lbs}$. and upwards at the 100 lb . rate.
Mr. Alexander Main, Farmington School, Conn., writes: "Without doubt the new Boston Parks Grass Seed is the seed to make a nice green lawn. I recommend it to any one who desires to get a satisfactory lawn."

## Farquhar's Special Grass Seed Mixtures.

# FARM AND FIELD GRASSES. 

Prices Subject to Market Fluctuation.

Timothy.

Timothy or Herds Grass. Phleum pratense. This Grass is usually considered and treated as a short-lived perennial, and hence is the best grass to grow in a short rotation. It succeeds best on moist loams and clays naturally rich in humus or on those which have been heavily manured. It grows in loose tufts, with few short leaves, so that Red Top or Red Clover should be sown with it to furnish heavy bottom growth of leaves. Sow one-half bushel per acre if alone. ( 45 lbs . per bushel.) Per bushel, $\$ 4.50$.
Red Top. Asrostis vulgaris. A good permanent grass, which grows naturally in cold, wet soils. It should be grown in cultivation in similar situations. A perennial with long creeping stems and underground runners; one of the best bottom grasses bearing large numbers of fine root leaves, making it invaluable for sowing with erect tufted Grasses, such as Orchard and Timothy filling in between the clumps and producing a continuous turf. Sow four bushels per acre if alone. ( 10 lbs , per bushel.) Per lb., 18 cents; per bushel, $\$ 1.60$; 100 lbs ., $\$ 14.00$.
Red Top. Clean Seed. Chaff and weeds sifted out; pure fancy seed. We recommend this to all who desire the best results, as its absolute purity and excellence insure satisfaction for farm, park or lawn. Excellent for restoring worm-out swards. Per lb., 30 cents ; $100 \mathrm{lbs} ., \$ 25.00$.
Kentucky Blue. Poa pratensis. Known as Fune Grass. A perennial especially adapted to dry limestone soils, but will thrive on any good ground which is not too wet. Very nutritious, hardy, and early. Sow three bushels per acre if alone. (14 lbs. per bushel.) Per lb., 35 cents; 100 lbs., \$30.00.
Rhode Island Bent. Agrostis canina. A bottom Grass, suitable for using with tufted varieties. Hardy and early and a grass that will withstand heat and dry weather. Sweet and nutritious and relished by all kinds of stock. Sow four bushels per acre if alone. ( 10 lbs . per bushel.) Per lb., 35 cents ; 100 lbs ., $\$ 32.00$.
Orchard. Daclylis glomerala. A deep rooted perennial, growing in tufts. A strong, vigorous grower, which succeeds best on rich lands or clayey soils. Should be cut for hay at the time of first flowering. Sow three bushels per acre if alone. ( 14 lbs . per bushel.) Perlb., 30 cents; per bushel, $\$ 4.00$; 100 lbs ., $\$ 28.00$.
Tall Oat Grass. Avena elatior. A perennial which grows in loose tufts and throws up an abundance of leaves and tall stalks. Succeeds best on rich upland soils, and when once established is a great drought resister. Early. Makes its heaviest growth the second year. Lb., 35 cents; 100 lbs ., $\$ 30.00$.
Italian Rye Grass. Lolium Italicum. A biennial which grows in broad compact tufts, producing a large number of stalks from a single root. Succeeds best in warm, rich, moist soils. A rapid grower and a good crop to rid land of weeds, as it quickly overtops them, preventing them from ripening seeds. Sow three bushels per acre. ( 22 lbs . per bushel.) Per lb., I 5 cents; 100 lbs , $\$ 10.00$.
Perennial Rye Grass. Lolium perenne. A perennial forming large and broad tufts. Grows best on stiff, wet soils, and on heavy clays or marshy lands where the soil is good, it is one of the best pasture Grasses. In such situations it will last five to seven years, but on dry upland soils it is short-lived. ( 22 lbs . per bushel.) Finest seed, our direct importation. Per lb., I 5 cents; 100 lbs ., \$12.00.

## AUTUMN CATALOGUE, 1910

Meadow Fescue. Festuca Pratensis. A perennial which succeeds best on rich moist loams. A heavy yielder on soils perfectly adapted to it. and also an excellent pasture Grass. Sow two and a half bushels per acre. ( 15 lbs . per bushel.) Per lb ., 40 cents; 100 lbs ., $\$ 35.0 \mathrm{c}$
ous
Leaved Fescue. Festuca heterophylla. Early hardy perennial two or three feet high. Valuable for permanent pasture. Thriving Various Leaved Fescue. Festuca heterophylla. Early hardy perennial two or three feet high. Valuable for permanent pasture. Thriving Hard Fescue. Festuca duriuscula. This splendid Grass is found in all the best lawns and permanent pastures; invaluable for dry soils; of low, dense-growing habit. Sow three bushels per acre ( 14 lbs . per bushel.) Per $1 \mathrm{~b} ., 30$ cents; $100 \mathrm{lbs}, \$ 25.00$
Red or Creeping Fescue. Festuca rubra A splendid grass for light sandy soils. Extreme drought resister. Valuable in seeding banks and exposed locations, binding drifting sands, and as lawn grass for shady spots. Forms a very close, durable turf, suitable for 1 thtuk greens. Lb., 30c.; 100 lbs., $\$ 25.00$.
Sheep's Fescue. Festuca ovina. Of dense growth; excellent for dry situations and sheep pastures. Sow two and a half bushels per acre 12 lbs . per bushel. ) Per 1 b ., 30 cents; $100 \mathrm{lbs} ., \$ 25.00$.
Fine Leaved Sheep's Fescue. Festuca ovina tenurfolia. A very fine leaved Grass, dwarf in habit. Will succeed in dry, high locations and inferior soils. Hardy and durable. Per 1b., 70 cents; 100 lbs ., $\$ 65.00$.
Tall Fescue. Festuca elatior Excellent for permanent pastures on moist soils, on which it yields immensely. Cattle and stock eat it greedily. ( 15 lbs . per bushel.) Per 1b., 45 cents; $100 \mathrm{lbs} ., \$ 40.00$.
Crested Dog's Tail. Cynosurus cristatus. A perennial valued for its dwarf habit and its hardiness. Sow two bushels per acre. (28 lbs. per bushel.) Per lb., 50 cents; roolbs., $\$ 50.00$.
Sweet Vernal, True Perennial. Many seedsmen substitute the annual variety for this invaluable Grass, as the seed of both is similar. Invaluable in lawns on account of its very early growth and fragrant odor, which it imparts to the other grasses in drying. Remains green very late. Hardy and permanent. Per $1 \mathrm{~b} ., \$ \mathrm{I} .00$.
Meadow Fox=Tail. Alopecurus pratensis. Very valuable in mixtures for permanent pastures exposed to heat and drought; early and rapid in growth. ( 8 lbs . per bushel.) Per lb ., 35 cents; $100 \mathrm{lbs} ., \$ 30.00$.
Rough-Stalked Meadow. Poa trivialis. An excellent permanent Grass to mix with other varieties for moist pastures. Produces a constant supply of nutritious herbage. Suitable for growing in shade. Sow one and a half bushels per acre. (I4 lbs., per bushel.,
Per lb. 40 cents; ioo lbs., $\$ 3.00$. Per lb., 40 cents; 100 lbs., $\$ 35.00$.
Wood Meadow. Poa nemoralis. Well adapted for growing under trees and in shaded situations. Dwarf and fine growing. Sow two and a half bushels per acre. (r4 lbs. per oushel.) Per lb,, 90 cents.
Water Meadow Grass. Poa aquatica. A creeping rooted perennial, grows in alluvial marshy soils, slow running streams, margins of fresh water, lakes, etc. An excellent pasture grass for wet situations. Trout and wild duck relish the seeds and young shoots as tood. Per lb., 75 cents.

## CLOVERS.

Red Medium. Trifolium pratense. The best clover for all practical purposes. Succeeds best on rich warm loams, containing humus. Lime and potash are essential for its best development. A biennial, but by close pasturage may be made to last several years. Per lb., 25 cents; 100 lbs ., $\$ 22.50$.
Mammoth or Large Red Northern. Trifolum pratense. On rich loamy soils this variety grows nearly twice as large as the Merliu:n Rell Clover, and earlier to start a spring growth. Per $1 \mathrm{~b},{ }^{2} 25$ cents; ioo $1 \mathrm{lbs} ., \$ 22.50$.
Alsike or Swedish. Trifolium hybridum. This Clover will thrive where the soil is quite wet, and will even stand flooding without being killed. Productive and sweet and extremely valuable for both pasturage or soiling. The flowers afford a fine pasturage for bees. Per lb., 30 cents; 100 lbs., $\$ 25.00$.
White Clover. Trifolium repens. This Clover should always be sown on permanent or temporary pastures. Will grow on any soil, but especially adapted to low meadows, where the surface soil is mellow and. rich.

Orchard Grass.

Per lb., 35 cents; 100 lbs., $\$ 30.00$.
Alfalfa or Lucerne. Medicago sativa. The chief merit of Alfalfa is the fact that it can,becut three or four times in a season. The soil should be deep, rich, and well-prepared. It does not succeed on compact clay, nor on land with impervious subsoil. The roots shoot downward till they are ten or fifteen feet below the surface, and will therefore resist the driest weather. Per 1b., 30 cents; 100, $\$ 25.00$.
Scarlet or Crimson Clover. Trifolium incarnatum. This annual Clover thrives best on warm, loose, sandy soil. Its chief value is as a winter or early spring pasture crop and as a green manure. May be sown at any time from May to October. Per lb. 20 cents: roo lbs., \$18.00
Yellow Trefoil. Medicago lupulina. On very light, dry, or poor ground this variety is valuable for a sheep pasture, and can be sown alone or with other Grasses. Per lb., 15 cents ; 100 lbs., \$12.00.

Tall Fescue.

## FARQUHAR'S SPECIAL GRASS MIXTURES.

IT is a well-established fact that soils sown with a variety of different grasses which are adapted to the soil and which attain perfection at alternate months from April to September, produce very much larger and more satisfactory crops, both for hay and pasturage, than when only one or two kinds of grasses or clovers are sown. The results given by our mixtures have been most satisfactory, and have resulted in a very large increase in our trade for same. We unhesitatingly recommend them for use on the largest scale. Fall seeding is preferable, but spring sowing will be successful if done early, when the land is cool and moist. In addition to the Grasses, we advise sowing 10 lbs . of mixed Clover Seed per acre. Clovers in their young state are tender in our climate, and should therefore be sown in spring, separately, being heavier in weight.

MIXTURES FOR PERMANENT PASTURES FOR ONE ACRE.

For Good Soils, Cool and Moist.
8 lbs. Timothy
Fancy Ked Top.
Orchard Grass.
Perenuial Rye Grass.
Sheep's Fescue.
Hard Feacue.
Meadow Fescue
Tall Oat Grass.
Meadow Foxtail
Kentucky Blue Grass. erennal sweet Terual.

## 10 lbs. Mixed Clover Seed sufficient for one acre, $\$ 2.50$.

Sand Vetch, or Hairy Vetch. T̈̈ic rillosa. This annual is a native of Western dsia, and has been cultivated in this country and Europe for about fifty years. Its desirability as a forage crop has become established, and it is being cultivated each year on a more and more extensive scale. It should be sown at the rate of from four to six pecks per acre, broadcast or in drills, from August 15 to October 1, and with it as a supporting crop to raise the vines up off the ground there should be planted from two to four pecks of winter Wheat, Oats, or Rye. It should be cut while the Vetch is in full bloom. It may be planted in spring in order to supply an early green crop for soiling purposes, or in midsummer for late autumn forage. Per ll., 10 c ; 100 lbs ., \$9.00.

Rye, Fall or Winter. The time for sowing is from the middle of August to the last of September. Prepare the ground as for Wheat and sow broadcast, or with a drill at the rate of one and one-half bushels per acre. This has no equal as a crop to be used for late fall and early spring pasture, and is one of the best to turn under for green manure. ( 56 lbs . per bush.) Per bushel, $\$ \mathrm{r} .75$.

## FERTILIZERS.

Prices subject to change.

## FARQUHAR'S LAWN AND GARDEN DRESSING

The best fertilizer in the market for all garden and farm crops. It is as dry and fine as meal; made of dried, finely pulverized blood bone, potash and refuse meat. The mixture is in such good mechanical condition that it can be applied conveniently by any one For lawns it is most excellent, being not a stimulant merely, but a plant food of lasting, enriching properties. Price, per ton, $\$ 50.00$

## PURE CANADA UNLEACHED HARDWOOD ASHES

Pure wrood ashes is one of the best fertilizers for top-dressing lawns, grass lands, and for seeding down; also for fruit of all kinds, especially strawberries, peaches, and apples. They are exceedingly valuable for lawns, imparting a rich dark shade of green, destroying insects and bad weeds, particularly moss, which is so common on lawns. $100-\mathrm{lb}$. bag, $\$ \mathrm{r} .25 ; 200 \mathrm{lbs} ., 82.50$; ton,
 bulk, or $\$ 18.00$ per ton in roo-lb. bags, delivered at any freight station in Massachusetts, Vermont, New Hampshire, Rhode Island, Connecticut, and to any station in Maine except points on the Maine Central R.R.

## PULVERIZED SHEEP MANURE.

PCRITY BR.AN゙D

A soluble plant food highly recommended for all purposes where a first-class fertilizer is required. It is a pure, natural manure, and has long been recognized as one of the most beneficial. As a top-dressing for lawns it is unequalled. For lawns it should be used at the rate of 500 to 800 pounds per acre. As a fertilizing agent for plants indoors and in the open garden, it is one of the very best. Price, ton, $\$ 40.00$; half ton, $\$ 20.00$; $500 \mathrm{lbs} ., \$_{10} 00$; $100 \mathrm{lbs} . \$_{2.50 ;} 50 \mathrm{lbs}$. \$1.50; $25 \mathrm{lbs} ., \$ 1.00$; ro lbs., . 50 ; $5 \mathrm{lbs} .$, . 30 : 1 I?

## PURE GROUND BONE.

This is made from the best quality of bone, finely pulverized by improved machinery. It is far superior to some ground bone in the market, which is often composed of refuse bones from which the plant food has been largely removed in manufacturing glue and other products. Price per ton in bags, $832.00 ; 500$ lbs., $\$ 8.00$; 100 lbs., $\$ 2.00$; 50 lbs., $\$ 1.25$; 25 lbs., 75 ; io lbs., 35 .
Flour of Bone. A finely pulverized powder, excellent as a topdressing for growing plants in the greenhouse. Price, 100 lbs ., $\$_{3.00 ;} 50$ lbs., $\$_{1.75 ;} 25$ lbs., \$1.00.

## SCOTCH SOOT

A fertilizer and fungicide. One of the best remedies and preventatives for mildew, when mixed with sulphur, at the rate of tro-thirds soot and one-third sulphur. As a fertilizer it promotes growth, and heightens color of foliage and flower. Price, $\$ 2.5^{\circ}$ per original bag of about roo lbs

## CLAY'S FERTILIZER. (Imported.)

A lasting, productive, economical fertilizer for all horticultural purposes. A reliable vitalizing medium for conservatory, greenhouse, and garden. Highly recommended by leading horticulturists in the cultivation of flowers, fruit, and vegetables for exhibition, pleasure, and profit in the highest perfection. Original bags, 112 lbs., $\$_{7.00}$; $56 \mathrm{lbs} ., \$_{4.00}$; $28 \mathrm{lbs} ., ~ \$ 2.25$; $1+\mathrm{lbs} ., \$_{1.25}$ 7 lbs., 75

## THOMSON'S SPECIAL CHRYSANTHEMUM MANURE.

This Special Manure is meant to be used as an additional stimulant during the growing season. A heaped dessertspoonful will be sufficient for a ro-inch pot, sprinkled over the surface of the soil, and watered in with tepid water. This may be given three times during the growing season, 56 lbs ., $87.00 ; 28 \mathrm{lbs}$. \$4.00; 14 lbs., $\$_{2.25} ; 7$ lbs., $\$_{\text {I. } 25}$

## IMPERIAL PLANT FOOD

A clean, dry powder which entirely dissolves in cold water Is used dry, mixed $\pi$ ith earth or sand, or is first dissolved in water

## BON ARBOR

A liquid plant food good for all living plants. It invigorates, promotes grow th, increases the crop and causes it to mature earlier It is a wonderful fertilizer.
Put up in I and 2 -gallon kegs, $\$_{2} .00$ per gallon; in 25 -gallon barrels, \$1.50 per gallon; in 50 -gallon barrels, $\$$ r. 25 per gallon
Dry Bon Arbor. Price $\frac{1}{2}-1 \mathrm{lb}$. package, 30 ; $1 \mathrm{lb} ., 55 ; 5 \mathrm{lbs}$., SI. 80 . Bowker's Ammoniated Food for Flowers. Made expressly for flowers grown in the house or garden; clean, odorless, and produces early abundant blossoms, greatly adding to the richness and brilliancy of color, health, and luxuriance of the foliage. It is clean and absolutely odorless, thus supplying a long-felt want by ladies and florists. Price, put up in neat packages with directions for use, No. I, .15; No. 2,.25. If ordered by mail. add 6 cents for No. 1, and 12 cents for No. 2, to prepay postage

## PEAT, MOSS, POTTING SOILS.

Charcoal. Price, per lb., . 10 ; $100 \mathrm{lbs} ., \$ 5.00$.
Silver Brand. For propagating, mixing with plant soils, etc. Price, per barrel, $\$_{2.50}$; bush., $\$_{1.50 ; \text { peck, } .50}$
Rotted Fibrous Peat. An excellent material for mixing with potting soils for many plants. This peat has been dug from an old bog and exposed for a number of years until it has become thoroughly decayed, and is very fine and light. Price, per barrel, \$2.00; bush., \$1.00
Orchid Peat or Fern Root. Price, per bbl., \$2.75; bush., \$1.50
Prepared Potting Soil. A carefully prepared soil for pot plants; composed of Leaf Mould, Peat, Loam, Sand, and a sufficient quan tity of fertilizer. Price, per barrel, \$2.00; bush., \$1.00
Sphagnum Moss. We furnish a Moss of excellent quality for the gardener's use. We can supply it at most seasons freshly gathered or dried. Price, per bag, $\$_{1.50}$; bush., $\$_{1.00 ;}$ bale. $\$ 6.50$.
Cocoanut Fibre. Price, ${ }^{125}-1 \mathrm{~b}$, bag, $\$ 1.25$; per ton, $\$ 15.00$

# R. \& J. FARQUHAR \& CO., BOSTON. 

INSECTICIDES.

Aphine. A contact spray for killing red spider, thrip, white and green fly. Price, quart, \$1.00; gallon, \$2.50.
Aphis Punk. It kills bugs under glass, 60 per box i doz. rolls; $\$ 6.50$ per case 1 dozen boxes. 3 rolls will fumigate 100 -foot house
Imperial Soap Spray. The base is a soap containing vegetable poisons, particularly effective against red spider on fruits. Quart, 50 : gallon, $\$ 1.50$; 5 gallons, $\$ 6.00$
Bowker's Concentrated Lime Sulphur. Kills San Jose Scale, bark lice, etc., and spores lodged on the bark. Needs only to be diluted with cold water and applied while the trees are dormant. ## MISCELLANEOUS. - Continued.

Fruit Picker. Made of heavy galvanized wire, easily adjusted to a pole. For picking Apples, Peaches, Pears, etc. Does not bruise the fruit. Price, 35c. each.
Pruner, Water's Improved Tree. The Water's Pruner never fails to cut the slightest twig. The thin blade of the Pruner passes through the limb so easily that the grain is uninjured, and the bark left smooth. Length, 4 ft ., each, 75 c . ; 6 ft ., $85 \mathrm{c} . ; 8 \mathrm{ft}$., $\$ \mathrm{t} .00$; 10 ft ., $\$ 1.15 ; 12 \mathrm{ft}$., $\$ 1.25 ; 16 \mathrm{ft}$., $\$ \mathrm{~s} .50$. Extra blades, 20c. each; $\$ 2.00$ per dozen.
Pruner, Telegraph Tree. The blade can be taken out to be sharpened ; there is a steel coiled spring for throwing out the blade; the socket has a thread on the inside, and can thus be easily screwed on to a pole of any length. Sold without handles. To be operated with a cord. Price, $\$ 1.00$ each. Extra blades, 30 c . each; extra springs, 25 c . each.
Pruner, The Rockdale. Blades made from the best tool steel. Will cut $11 / 4$-inch stick with ease. Length, 26 inches, 75 c. ; 41 inches, $\$ 1.00$.
Saw, Farquhar's Pole Pruning. For cutting strong, high limbs of trees. Each, handled, $\$ 1.85$; without handle, $\$ 1.50$.
Saws, Pruning. Long, narrow blades for pruning. Single edge, $18-\mathrm{in}$., $75 \mathrm{c} . ; 20$-in., 85 c . ; 22 -in., $\$ 1.00$. Double edge, 18 -in., $\$ 1.00$; 20 -in., \$1.25; 22-in., \$1.50.
Shears, New French Pruning. This is the best pruner ever offered; quality unequalled. Price, $61 / 4$-inch, $\$ 1.35 ; 7$-inch, $\$ 1.50 ; 81 / 2$-inch, $\$ 1.75 ; 91 / 2$-inch, $\$ 2.00 ; 101 / 4$-inch, $\$ 2.25$. By mail, 10 . each extra. Extra springs, 30c. each.
Shears, Taylor's Pruning. The best low-priced pruner. Each, 500 . By mail, loc. extra.
Shears, Hedge Notched. Blade, $7 \frac{1}{2}$-inch, $\$ \mathrm{r} .60 ; 8$-inch, $\$ \mathrm{r} .75 ; 9$-inch, $\$ 2.00$; 10-inch, $\$ 2.50$.
Shears, Branch or Lopping. For cutting large branches; long, stout handles. Saynor's, three sizes, $\$ 2.75, \$ 3.00, \$ 3.50$ each.
Paper, White. For cut flowers. Sheets, $24 \times 36$ inches, per lb., 10 c .; 25 lbs., $\$ 2.00$
Paper, White Tissue. Sheets $24 \times 36$ inches; per lb., 20c. ; per ream, 10 lbs., $\$ 1.75$.
Paper, Brown Manila Tissue. For cut flowers, Sheets $24 \times 36$ inches. Per ream, $\$ 1.25$; per lb., 15 c .
Paper, Parcelling. Sheets $20 \times 30$ inches, $24 \times 36$ inches, $30 \times 40$ inches; per lb., 8 c . ; per ream, 50,60 , and $100 \mathrm{lbs}$. , respectively, 6 c . per lb.
Paper, Waxed. Thin, white; aids in preventing the escape of moisture. Sheets $18 \times 14$ inches; per lb., 30 c . ; per reanc, 5 lbs ., $\$ 1.25$.

## CUT-FLOWER BOXES.

"C. L." or Corner Lock Style.

Size
Per 100

$4 \times 24 \times 8$ 4.75

Extra Heavy Boxes for Shipping.

Scollay's Rubber Plant Sprinkler. Made of rubber, with flat bottom and a finely perforated, detachable top. Very useful for sprinkling, and all purposes where a fine spray is required. Three sizes. 60 c, , 75 c . and $\$ 1.00$; by mail, roc. each extra.
Scollay's Angle Rubber Sprinkler. By means of this new device liquids can be applied to the under side of the leaves. Price, each, \$1.00.

## ADJUSTABLE WATER-BARREL TRUCK.

 barrel be detached at pleasure, for carrying water to the garden or lawn during dry weather, for emptying cesspools, and for innumerable other purposes.
Price, truck and barrel complete, wheel, 2 -inch tire, \$10.50; without barrel, \$7.50,
Price, truck and barrel complete, wheel, $3^{1 / 2}$-inch tire, $\$ 12.75$; without barrel, $\$ 9.75$. The following extra attachments can be supplied for use on the same truck when the barrel is detached, viz.: Hand Cart Box, $\$ 3.25$; Leaf Rack, $\$ 5.50$; extra barrels with trunnions, $\$ 3.00$; Sprinkler AtTACHMENT for barrel, $\$ 3.50$.

## IVY AND VINE POT TRELLISES.

These are made of heavy wire, painted green, and a decided improvement over the wooden trellis.

$$

Perfection Fumigator. The tank should be filled with tobacco water. When in operation a vapor arises from this and mixes with the dry smoke from the stems, producing a dampened smoke more dense and less injurious than from any other fumigator made.

> No. 1, holds one peck of Stems . . . . . . . $\$ 3.00$ " 2, holds half bushel of Stems " 3, holds three-quarters bushel Stems . . . . . 3.50 4.00

## THERMOMETERS.

Heavy Japanned Tin Case. Wilder's 8 -inch, 75 c .; ro-inch, $\$ \mathrm{r} .00$; 12 -inch, \$1.25.
Hot-Bed Thermometers. 16 inch Boxwood Scale. Brass Points. Each, \$2.00.
Self Registering Thermometers, Minimum. ro inch. Each., 1.75.
Taylor's No. 55 B, 8 =inch Combined Maximum and Minimum. Each, $\$ 3.00$.

## GREENHOUSE CONSTRUCTION.

We are pleased to furnish plans and estimates for greenhouse construction, also for greenhouse ventilating and heating apparatus.

Sectional Hot-Water Boiler.

## STRAWBERRY PLANTS.

Strong Pot-Grown Plants.

All the varieties offered are perfect-flowering (bisexual) except where marked $P$. The latter are pistillate and require a row of a perfect-flowering sort planted every 8 or so fiet to pollenize their blossoms.
These plants, being grown in pots, may be shipped to a distance and planted with almost no interruption to their growth. The plants may be set in beds of three rows, one foot apart and one foot distant in the rows, with a space of two and one-half feet between the outside rows of adjoining beds left for a pathway. They may also be planted in single rows three feet apart and one foot apart in the rows.
POT-GROWN PLANTS. From $21 / 4$ in. pots, well rooted; delivery in August and September. Per $100, \$ 3.00 ; 250, \$ 6.50 ; 500, \$ 12.50 ; 1,000, \$ 25.00$, for all varieties, except where otherwise priced.

## FIRST EARLY.

Excelsior. The fruit is of round conical form, glossy, dark red color, and of mildly acid flavor.
Fairfield. Mr. Johnson, the introducer, says he has never seen any berry nearly its equal for earliness, large size, attractive color, quality and firmness.
St. Louis. A very productive, early variety, with large berries similar to Excelsior.
Success. Large, round, bright scarlet, flavor always fine.
Texas. An extra early variety producing immense crops of large, glossy, crimson berries, which are rich and juicy. The plants appear to thrive in all soils.
A Pot-grown Strawberry Plant
Virginia P. A medium sized berry of recent introduction ; flavor excellent; enormous yielder

## SECOND EARLY.

Climax. This is an extremely popular new variety, immensely productive, the berries being slightly over medium size. Plant vigorous, healthy grower, of a peculiar shade of green that can be distinguished from other varieties. Our stock is from plants procured of the originator and is exceptionally fine.
Glen Mary. Large, conical, bright red berries; firm and of fine flavor.

Sample. P. Excellent for either market or home use; prolific, large, firm, and delicious
Senator Dunlap. Mr. Crawford, at the time of its introduction by him, said that he doubted if he had ever sent out a berry better than Senator Dunlap. It will keep in fair condition for several days on the vines after being ripe enough to pick. The fruit is large, rich and dark red clear to the centre, with a very rich flavor.

## MEDIUM.

Barrymore. This new strawberry was awarded a Silver Medal by the Mass. Hort. Society in 1908, for its excellence. The plants are of strong growth and very productive. The conical shaped berries are of medium size and of a dark, glossy, crimson color ; the flesh is a rich red and very juicy. Per doz., $\$ 2.00$; per 100, $\$ 15.00$. Ready August 1 st.
Abington. A strong growing native variety of recent introduction. The fruit is of large size, bright red in color, very solid and of excellent flavor.
Bubach. P. A well known popular variety, with large berries of a rich, bright red color; very prolific.
Big Ben. A new seedling variety of merit which in some sections of this state has become the favorite fancy market sort. The plants are of vigorous growth and very productive with large fruit of a rich crimson color. Per $100, \$ 4.00 ; \$ 35.00$ per 1000 .
Brandywine. A large heart-shaped berry, perfect in form, bright red in color, firm flesh, red to the centre and of rich spicy flavor. A great cropper especially on heavy soils, holds its fruit well up from the ground and generally succeeds everywhere.
Golden Gate. A strong growing variety bearing rich crimson fruit without green tips and with quality similar to the Marshall. It blooms
early and late making it a good variety to pollenize the pistillate sorts.
Mark Hanna. P. An exceedingly prolific variety ripening in midseason. The berries are of enormous size, attractive in color and of splendid quality
Marshall. The fruit of this remarkable sort is of enormous size, of handsome, glossy, dark crimson color, and of delicious flavor. It is one of the best midseason berries, either for private use or market. It is a vigorous grower and requires good soil and high cultivation. As it does not thrive in all soils, it should not be planted extensively until its adaptability is ascertained.
Minute Man. P. Very productive, and free growing sort with large solid berries. A fine market variety.
New York. One of the best sorts for private or market gardens. The berries are large, of long conical form; dark red color, firm texture and of remarkably sweet flavor. In the market they sell at sight.
Pride of Cumberland. The plant is a vigorous grower and free from rust, and ripening about one week earlier than Gandy; It is nearly as large, equally firm, as good a color, thriving in either high or low land, but owing to the immense crops it sets, the ground should be well fertilized to ensure best results.

## LATE TO VERY LATE.

Belmont. This old favorite is still considered by many to be the finest late berry. The fruit is of handsome appearance and keeps well.
Chesapeake. The plants of the Chesapeake are large and vigorous with rich dark green foliage. The fruit is of large size, deep red in color and of a rich aromatic flavor.
Commonwealth. This is the latest of all Strawberries; bearing large conical, deep crimson fruit, sweet and of quality equal to the well known Bubach. Not only an extra large berry, but also very productive, of deep rich color and solid. It is smooth and quite juicy. The plants are strong, not quite so rank in growth as the Marshall, and free from rust. One of the best introductions of recent years.
Gandy. This popular old variety is probably known by most berry growers. It is more largely grown than any other late variety. It is at home on black swamp land if well drained, upon medium stiff or red clay land. On sandy soils it is unproductive. All late varieties are compared by Gandy, which is the highest praise that could be given it.

Large size, fine appearance and remarkable keeping and carrying qualities.
New Home. As late and large as Gandy, fruit a bright red color that does not lose its lustre and turn dark for a long time after being picked. It is a vigorous grower, and, unlike Gandy, will produce a large crop on either high or low land. The fruit is so firm and keeps so well, it does not need to be picked oftener than three times a week. Its great productiveness, uniform large size, and unsurpassed carrying and keeping qualities make it one of the most desirable on the list.
William Belt. An exceptionally fine berry. In quality it heads the list. The berries are as large, with some specimens larger than the Bubach. It is about as productive as the Bubach. and of nearly the same shape. Its color is a bright, glossy, deep red; its season as late as Gandy.
Stevens' Late Champion. A new variety of the Gandy type yielding large crops of beautiful berries very late in the season. In New Jersey it is considered one of the finest sorts for late crop.

## ENGLISH VARIETIES. Per dozen, \$1.25. Ready August ist.

British Queen. A popular English variety producing large, conical pale red berries of excellent flavor
President. The fruit is crimson in color and of superior flavor.

Standard. Very early, small dark red berries of fine flavor, forces well.
Duke of Edinburgh. Late. Fruit irregular, but otherwise similar to British Queen.

## Gardeners and Superintendents

We are always able to find Competent Gardeners and Superintendents for the management of estates.

We recommend no man unless we know him or have satisfactory reference as to his character and ability. In consequence of this care, the men we recommend rarely fail to give satisfaction. We make no charge to either party for this service.
